

MAURICIO TAPIA

AGE	41 years
GENDER	Male
COUNTRY	Chile
EDUCATION	High School
OCCUPATION	Construction Worker
MARITAL STATUS	Married

Hobbies and Interests

Playing football on weekends
Home improvement projects
Spending time with his kids

Biography

Mauricio was evacuated from his home due to mudslide risks, but was separated from his family during the chaos. He arrives at the shelter looking for answers. His current mindset is summarized as: "Please, just tell me if my wife and little boy are registered here or if I should go look at the shelter in the next municipality."

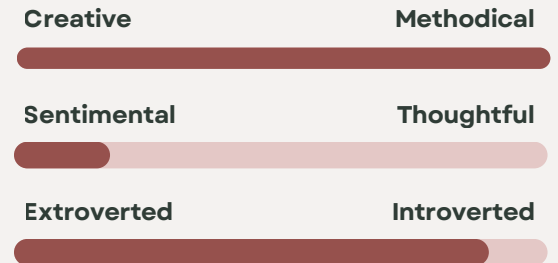

Motivations

He desperately seeks to provide an accurate status ("Provide accurate status") regarding his family's location. He is motivated by the possibility of a quick reunion thanks to instant matching ("Instant matching").

Goals

Confirm if his family is safe in any local facility, getting reliable information instantly.

Personalidad

What do they think of our products?

His biggest pain and current complaint is the sheer inability to find his loved ones ("I can't find my family") using paper registration methods. At the same time, he is concerned about the exposure of unwanted data ("Exposure of unwanted data") if lists with his family's names are left hanging on a wall in plain sight

How can we help them?

We help him by implementing a people search system ("People Search") that allows volunteers to confirm if his family is there. To protect his loved ones, the system will use algorithms to match data across shelters without exposing it publicly ("Cross-Shelter ID Hashing").

CAMILA SOTO

AGE 24 years old

GENDER Female

COUNTRY Chile

EDUCATION University (in progress)

OCCUPATION Student / Volunteer

MARITAL STATUS Single

Hobbies and Interests

Participating in social operatives
Organizing university fundraisers
Social media and fast communication

Biography

Camila participates as a volunteer at the reception of a shelter set up in a municipal school during forest fires. She has no technical background in using emergency management software. In her own words: "I need to register families really fast, the line is huge, people arrive super distressed, and sometimes the school's internet goes down."

Motivations

She is motivated to register arrivals quickly ("Register arrivals quickly") and achieve instant matching ("Instant matching") to notify families and calm the anxiety of the moment.

Goals

Speed up the shelter's admission line so evacuated families can rest and receive assistance as soon as possible.

Personality

Creative

Methodical

Sentimental

Thoughtful

Extroverted

Introverted

What do they think of our products?

He is frustrated by the inability to find his loved ones using paper records ("I can't find my family").

He also fears public lists will compromise his family's privacy ("Exposure of unwanted data").

How can we help them?

We provide a fast locator tool ("People Search") to confirm his family's status instantly.

We protect their privacy using secure data-matching algorithms across shelters ("Cross-Shelter ID Hashing")

ELENA CASTRO

AGE	27 years
GENDER	Female
COUNTRY	Chile
EDUCATION	University
OCUPACIÓN	Marketing
MARITAL STATUS	Divorced, Mother

Needs

Offline Access to Emergency Plans

Centralized cross-shelter communication

Low-Bandwidth Data Transmission

Biography

Elena is a 34-year-old mother living in Chile, which has made family emergency preparedness one of her highest daily priorities. She relies on regional digital tools and official communication channels to map out contingency plans, establish predefined family assembly points, and ensure her household is fully prepared to register and coordinate effectively if an emergency occurs.

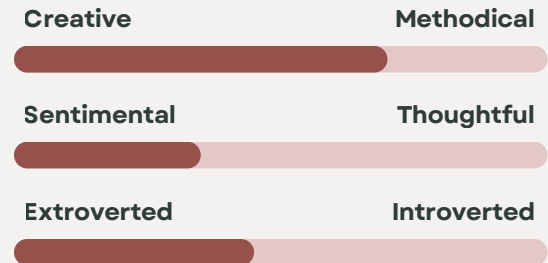

Motivations

Living in an earthquake-prone country, Elena is driven to teach her children how to respond during a disaster so she can protect them and keep them safe.

Goals

- Educating children: Teach emergency protocols and natural disaster procedures to their children.
- Safe planning: Designate designated shelters and supply collection points to ensure their children's safety.

Personality

What do they think of our products?

She values it as a resilient and secure lifeline. The offline-first capability and cross-shelter tracking give her confidence that her family's sensitive data stays protected while remaining searchable across facilities during network outages.

How can we help them?

By providing guided, zero-training forms to register her family without errors, and an instant Boolean matching engine to locate relatives across shelters even under degraded network conditions.
