

Customer Journey Map

Scenario: evacuated because of mudslide risk, Mauricio reaches a shelter without his wife and little boy and needs to know, fast, whether they are there.

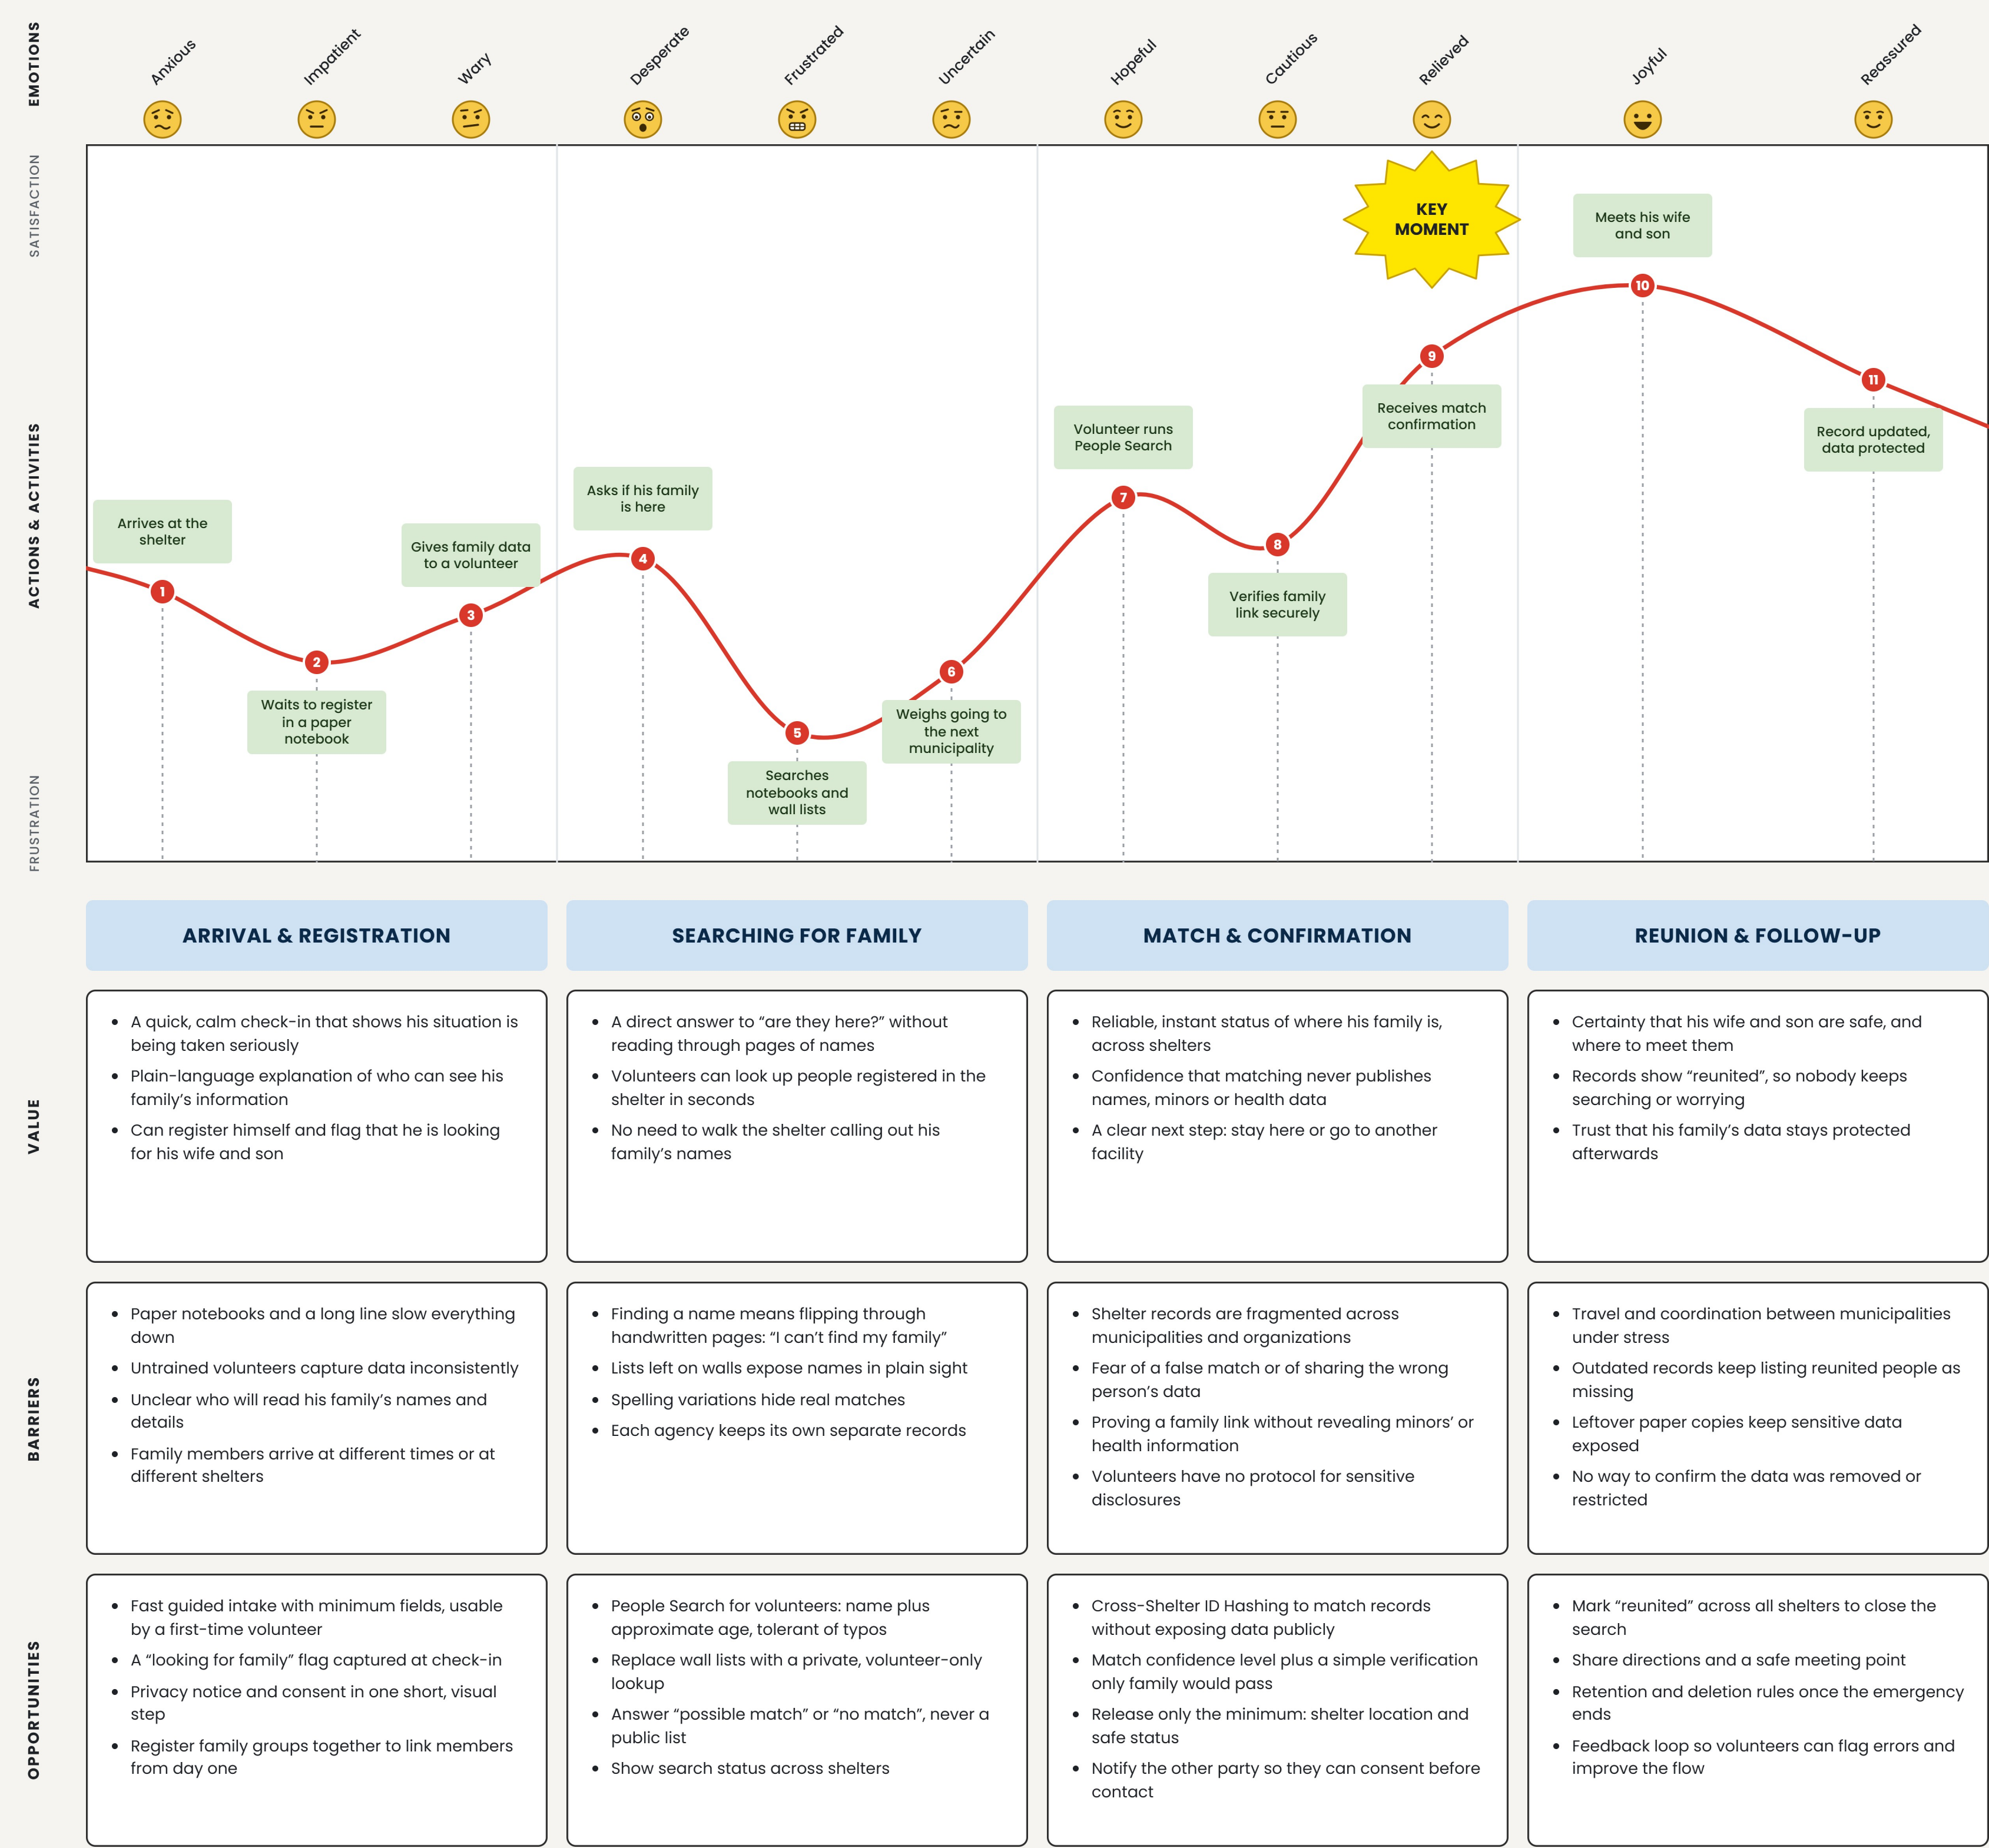

MT

Mauricio Tapia

41 · Construction worker · Married · Chile

“Please, just tell me if my wife and little boy are registered here or if I should look at the shelter in the next municipality.”

Goal: confirm instantly and reliably whether his family is safe in a nearby facility.

Design tension to resolve: visibility helps families find each other, while data protection keeps people at risk from being exposed. Every opportunity above aims to deliver both, under pressure and with untrained volunteers.
